

Project Initialization and Planning Phase

Date	15 March 2024
Team ID	EcoTrack-05
Project Name	EcoTrack - AI-Powered Carbon Footprint Tracker
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statements for EcoTrack:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A working professional who wants to live more sustainably.	Track and reduce my daily carbon footprint from travel, food, and energy use.	I have no easy way to measure how my daily habits impact the environment.	I lack access to real-world emission data and personalized guidance on what to change.	Overwhelmed and unsure where to start with sustainable living.
PS-2	An environmentally conscious college student on a budget.	Build eco-friendly habits without spending money on tools or consultants.	Most sustainability apps are generic and don't give actionable, personalized suggestions.	I don't get specific, practical alternatives suited to my own lifestyle and location.	Frustrated by generic advice that doesn't fit my routine.
PS-3	A commuter trying to lower his household's carbon emissions.	Understand which of my daily activities (travel, food, energy) contribute most to my footprint.	I have no single dashboard that breaks down my emissions by category.	My habits are scattered across transport, diet, and energy use with no unified tracking.	Motivated but lacking clarity and structure to take consistent action.
