Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Sign Up & Onboarding	Stage 2: Daily Logging & Tracking	Stage 3: Insights & AI Suggestions
Actions <i>What does the customer do?</i>	- Creates an account using Firebase Authentication. - Sets a personal daily carbon budget. - Explores the dashboard for the first time.	- Logs daily travel, food, and energy activities. - Selects transport mode, diet type, and energy usage. - Checks the carbon gauge after each entry.	- Visits the Suggestions page for eco-friendly tips. - Reviews 30-day trend charts and heatmap calendar. - Shares or exports the footprint report.
Touchpoint <i>What part of the service do they interact with?</i>	- Sign-up / login screen (Firebase Auth). - Onboarding walkthrough and budget-setting form. - Main dashboard landing page.	- Multi-step habit logger form. - Carbon calculation engine (Carbon Interface API). - Animated carbon gauge widget.	- Groq AI (LLaMA 3.3-70B) suggestion cards. - Chart.js trend and heatmap visualisations. - Badge and streak achievement panel.
Customer Thought <i>What is the customer thinking?</i>	"Will this actually help me understand my impact?" "I hope setting up an account is quick and simple." "What carbon budget should I even set for myself?"	"Is logging this every day going to be a hassle?" "Are these emission numbers actually accurate?" "Am I doing better or worse than yesterday?"	"These suggestions actually feel relevant to me." "I can finally see my progress over time." "I want to keep my streak going."
Customer Feeling <i>What is the customer feeling?</i>	- Curious but slightly unsure about the effort required. - Hopeful about building a more sustainable routine.	- Occasionally frustrated by manual data entry. - Satisfied when the gauge shows improvement.	- Motivated and encouraged by visible progress. - Proud when earning badges and maintaining streaks.
Process Ownership <i>Who is in the lead on this?</i>	Frontend team (React.js onboarding UI) and Firebase Auth setup lead.	Backend team (Flask API) and Carbon Interface API integration lead.	AI integration lead (Groq API) and data visualisation (Chart.js) owner.
Opportunities <i>How can we improve this stage?</i>	- Add a guided demo/tutorial for first-time users. - Auto-suggest a default carbon budget based on region. - Simplify sign-up with social login options.	- Add quick-log shortcuts for repeated daily habits. - Introduce reminders/notifications for consistent logging. - Allow bulk or voice-based habit entry.	- Personalise suggestions further using historical trends. - Add social sharing for badges to boost engagement. - Provide weekly email/summary reports.
