

Communication

Date	15 March 2026
Team ID	B Siva Krishna Santhosh Gowthami Botsa Jaya Sarvani Vengalasetty Pilipe Praveen Vaishnavi P
Project Name	EcoTrack - AI-Powered Carbon Footprint Tracker
Maximum Marks	1 Mark

Communication Plan:

Effective communication was essential for the successful delivery of EcoTrack. This document outlines the communication strategy used within the team and with mentors/stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp Group / Google Meet	All 5 team members	Share daily progress on habit logger, backend APIs, and AI integration; flag blockers early.
2	Progress Update	Weekly	Google Meet + Google Drive (shared docs)	All 5 team members	Review overall sprint progress against the project plan and update task status.
3	Issue / Bug Discussion	As Needed	WhatsApp Group / GitHub Issues	Relevant module owners (frontend/backend)	Discuss and resolve bugs (e.g., emission calculation errors, API integration issues) quickly.
4	Stakeholder Review	Bi-Weekly	Google Meet	All team members + mentor/reviewer	Present progress, get feedback on the AI suggestion feature and dashboard UX, and align on next steps.
5	Final Demo Rehearsal	Once	Google Meet (screen share)	All 5 team members	Walk through the full EcoTrack demo flow (sign-up, logging, dashboard, AI suggestions) before submission.
6	Code Review & Merge Sync	Twice a week	GitHub Pull Requests / WhatsApp	Frontend and backend leads	Review code changes before merging to the main branch and ensure consistency across modules.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Coordinating schedules across 5 team members with different class/exam timings	Fixed a common daily standup slot in the evening and used WhatsApp for asynchronous updates when someone couldn't join live.
2	Miscommunication on API contract between frontend and backend (e.g., field names for habit data)	Created a shared API documentation sheet in Google Drive so both sides referenced the same request/response structure.

S.No	Challenge Faced	Resolution / Action Taken
3	Delayed feedback on AI suggestion quality during integration	Set up a dedicated review session focused only on AI suggestion outputs, with quick WhatsApp polls to gather feedback faster.
